

the Shroud

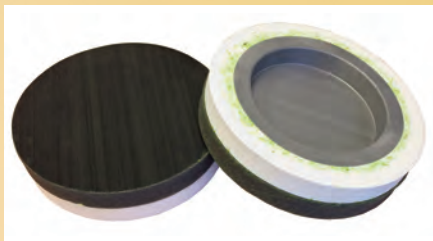

GEM is now able to offer a dust collection system with the introduction of its shroud accessory. The shroud easily retro-fits any GEM sander in the field and operates with any standard shop vacuum.

The shroud can be ordered separately, or pre-assembled with new machines. The shroud's outlet pipe is 1 1/2". However, GEM provides an adapter with every shipment for those whose shop vacuum uses 1 1/4" hose.

Fabricators can now feel comfortable taking the GEM sander "mobile" for on site installs and repairs, from people's homes, to large business sites.

ACCESSORIES AND CHEMICALS

C-515HDH
Firm Drive Pad

Replaces one of the foam layers with a firmer material for more aggressive work. Both pads available in Hook & Loop

M-15
Micro-Fiber Bonnet

Micro-Fiber is lint free and 10 times more absorbent than terry cloth. Use this bonnet to remove chemicals.

MF-T
Micro-Fiber Towel

Great all purpose shop towel for wiping up dust. 16" x 16"

M-16
High Pile Bonnet (High Pile)

Use this bonnet to apply chemicals.

C-523S
Acrylic Countertop Sealant

Seals any surface with a layer of acrylic. Protects against scratches and stains. Eliminates most maintenance problems on semi-gloss and high gloss surfaces. Apply with GEM Sander and Micro-Fiber bonnet. Comes in 32 oz. bottle.

C-645S
Solid Surface Compound

The required first step before applying the acrylic sealant. After all sanding and finishing is complete, apply compound with GEM Sander and Micro-Fiber bonnet. Prepares the surface for uniform bonding with the acrylic. Comes in 32 oz. bottle.
